

RELEASE BULLETIN 2021-002

myQA® is your flexible software solution integrating your QA applications, processes, workflow, and data into one framework.

IBA Dosimetry announces the release of version 2021-002 of myQA. This release includes User Uniformity Correction for myQA SRS as a clinical workflow enhancement. We listen to and value your feedback, and continually improve our solutions based on your needs.

Highlights and New Functionality

User Uniformity Correction for myQA SRS

- ✓ In addition to the myQA SRS factory calibration, users can now define and use User Uniformity Correction to maximize accuracy during stereotactic pre-treatment plan verification.

For further details, please refer to the Readme.pdf or updated user manuals for myQA 2021-002 (part of your release package).

Customers under warranty and myQA Coverage are entitled to receive myQA 2021-002 for the functionality corresponding to the purchased myQA modules.

Please contact your IBA Dosimetry service department in case of further questions.

Kind regards,

IBA Dosimetry Product Management
